

# Pablo Schneider

AI Full Stack Engineer · Product Engineering

Spain · pabloschneider.art · LinkedIn / pabloschneider

Full-stack and AI product engineer with 6+ years of experience shipping web products. I build across interfaces, backend services, and agentic systems, taking customer problems from an idea to production.

## EXPERIENCE

---

### Deeto

**AI Full Stack Engineer**

Mar 2024 — Present

- Build AI-powered products across frontend, backend, and orchestration with React, TypeScript, Node.js, and AWS.
- Design agentic workflows with LangGraph, tool calling, MCP, and OpenAI / Anthropic models; take features from architecture to production, working closely with product and customers.

### Mercado Libre

**Software Engineer**

Feb 2023 — Feb 2024

- Promoted to Software Engineer, leading frontend applications across three teams.
- Led Pymes: seller package updates reduced costs associated with call-center contacts by 6%. Led Handshake delivery reconciliation, handling peaks of 12,000 requests/minute.

**Software Developer**

Dec 2020 — Jan 2023

- Helped grow the FULL logistics seller base by 21% through personalized landing pages and targeted campaigns.
- Built seller migration features and a monitoring backoffice to support logistics and delivery-point optimization.

### Flexxus

**Full Stack Developer**

Jan 2020 — Dec 2020

- Progressed from intern to permanent developer. Built features with React, GraphQL, Apollo, Node.js, and SQL; deployed native applications to app stores.

## INDEPENDENT VENTURE

---

**ufology.io** — My startup: a development team building software. [ufology.io](https://ufology.io)

## EDUCATION & PROJECTS

---

**Universidad Tecnológica Nacional**

2016 — 2020

Information Systems Engineering studies.

**DivisaBot** · Sep 2019 — Dec 2020: Python bot sharing dollar exchange rates on Twitter.

## TECHNICAL FOCUS

---

**AI:** LangGraph, LLM agents, tool calling, MCP, RAG, OpenAI, Anthropic.

**Frontend:** React, TypeScript, Next.js, Tailwind CSS, Redux, React Native.

**Backend & cloud:** Node.js, AWS Lambda / S3 / Cognito, REST, GraphQL, DynamoDB, SQL.

**Observability:** Datadog, Sentry, Kibana, Google Analytics, experimentation.

## LANGUAGES & CERTIFICATIONS

---

English — Professional working proficiency · EFSET 68/100 (B2).

Security Guardian — Responsible of Security Application · Typescript: The Complete Developer's.
